BEC 30TH ANNIVERSARY CEREMONY

BEC held its 30th Anniversary Ceremony on 9 November to celebrate the organisation's 30 years of environmental excellence. Close to 200 government officials, business leaders and professionals, BEC Members, partners and staff gathered together to witness BEC's important milestone of 30th anniversary by recognising the organisation's past accomplishments and embracing the exciting opportunities ahead.

BEC was honoured to have Ms Diane Wong, Under Secretary for Environment and Ecology, as the Guest of Honour of the Ceremony. Ms Wong pointed out that the Government has set forth four major decarbonisation strategies, namely net-zero electricity generation, energy saving and green buildings, green transport and waste reduction, to lead Hong Kong towards carbon neutrality. She said, "All the decarbonisation strategies are challenging and the contribution from and collaboration with the business sectors and the community is essential. BEC's active role as a bridge between businesses and the Government on environmental issues has contributed in no small part to preparing our businesses and the community in practicing and adopting waste reduction and recycling."

In his opening address at the Ceremony, Mr Kevin O'Brien, Chairman of BEC, expressed his gratitude to all BEC's external and internal stakeholders for contributing to the organisation's success and highlighted BEC's achievements over the past three decades. He said, "BEC being a pioneer in environmental excellence in Hong Kong has excelled in research and advocacy of green buildings, waste management, ESG, decarbonisation and other important aspects of creating a liveable and sustainable world over the past three decades. For 30 years, BEC has been leading by example and converting word into action.

"I am pleased to have the opportunity to grow with BEC in enhancing environmental excellence of the city and contributing to the transition to a net-zero economy," Mr O'Brien added.

Mr Simon Ng, Chief Executive Officer of BEC, highlighted in his closing remarks that BEC is committed to galvanising business ambition into action for a net-zero Hong Kong. "With a vision to lead, enable and drive the business community to transform for a green, liveable and sustainable Hong Kong, BEC, with a broad membership base of over 230 members, provides a good platform for like-minded companies and organisations from all sectors to join hands and co-create a sustainable future," said Mr Ng.

Let's wish BEC Happy Birthday and many more successes in the years to come!

Mr Kevin O'Brien, Chairman of BEC expresses his gratitude to all stakeholders at BEC 30th Anniversary Ceremony

Ms Diane Wong, Under Secretary for Environment and Ecology (middle); Mr Kevin O'Brien, Chairman of BEC (left); and Mr Simon Ng, CEO of BEC (right), officiates at BEC 30th Anniversary Ceremony

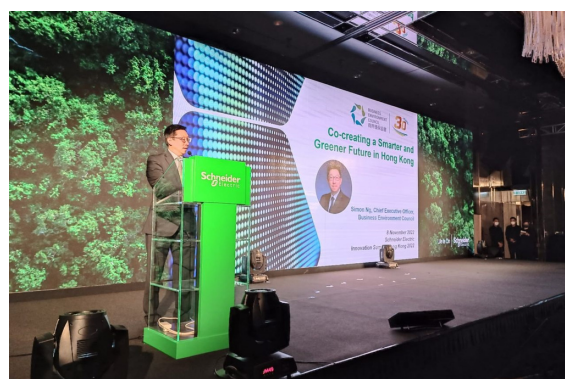

EU-HK SDGs Roundtable Discussions 2022

BEC CEO Mr Simon Ng was invited as a speaker at EU-HK SDGs Roundtable Discussions 2022 on 31 October. In his speech, Simon emphasised the utmost urgency in taking climate action. He highlighted BEC's mission to galvanise business action towards net zero, as exemplified by the launch of BEC Low Carbon Charter in 2019. In addition to his remarks on climate change and decarbonisation, Simon also reminded the audience of the importance of creating a circular economy, one of BEC's three Environmental Focus Areas.

Innovation Summit Hong Kong 2022

BEC CEO Mr Simon Ng was invited by BEC Council Member Schneider Electric to deliver a keynote speech on "Co-creating a Smarter and Greener Future in Hong Kong" at the Innovation Summit Hong Kong 2022 on 8 November, sharing his insights on how the business sector can co-create a more sustainable future together. Simon then moderated a CEO panel discussion on "Decarbonising Hong Kong through Innovations for Carbon Neutrality before 2050" with senior executives from large corporations exchanging ideas on achieving Hong Kong's carbon neutrality goal.

BEC CEO Speaks at HKEJ ESG Forum 2022

BEC CEO Mr Simon Ng joined the ESG Forum 2022 organised by the Hong Kong Economic Journal on 16 November as a panellist to discuss the relationship between corporate governance and resilience. He suggested that transparent governance structure and practice would enhance corporate resilience to various risks.

BEC Policy Dialogue Series: The Chief Executive's 2022 Policy Address

BEC was honoured to host Under Secretary for Environment and Ecology Ms Diane Wong at our Policy Dialogue Series on 21 November. Ms Wong gave an overview of the ongoing and new environmental initiatives as set out in the Chief Executive's 2022 Policy Address, before taking part in discussions with our Board Directors and members in the audience.

BEC Industry Visit to O-PARK2 Construction Site: How to Achieve Carbon Neutrality During Construction Period?

"BEC Industry Visit to O-PARK2 Construction Site: How to Achieve Carbon Neutrality During Construction Period?" took place on 24 November as a rerun due to great demand. Representatives from O-PARK2 introduced how they achieve carbon neutrality during the construction period and the construction site's sustainability elements and facilities.

RECENT PUBLICATIONS

Zero Waste Design for Buildings in Hong Kong

BEC's new research report "Zero Waste Design for Buildings in Hong Kong" focuses on how to incorporate circular economy principles into building designs to facilitate local waste management and drive behavioural change in waste reduction. Based on interviews with pertinent stakeholders in the local building value chain and site visits to various types of buildings, the report identifies local good practices and strategies that can possibly be widely adopted by existing buildings to enhance current waste management system.

To increase its transparency to communicate with stakeholders on climate and biodiversity impacts, **Towngas** has published its first stand-alone Climate-related and Nature-related Directive Guide. As a supporter of Task Force on Climate-related Financial Disclosures ("TCFD"), the company is committed to building a more resilient financial system through climate-related disclosure. The guide aligns disclosures with the recommendations of TCFD and discloses financial information related to the potential opportunities and risks led by climate change. Towngas is also the first company in Hong Kong to publish a directive document in response to the Taskforce on Nature-related Financial Disclosures ("TNFD") framework.

Corporate Members

Co-hosted by **Allied Sustainability and Environmental Consultants Group Limited ("AEC Group")**, the 2022 GRESB Regional Insights Event Hong Kong has drawn to a successful close, with around 200 participants joining in-person and online. Mr Dennis Wu, CEO of AEC Capital and Ms Grace Kwok, Chairman of AEC Group and GRESB Real Estate Standards Committee Member, shared their in-depth views on GRESB result highlights and net-zero solutions, while the heavyweight panellists in the panel discussion brought the audience a thought-provoking reflection on the latest development of GRESB and how to enhance real estate sustainability.

ATAL has achieved "No.1 ESG Engineering Enterprise Award" in the "Headline No.1 Awards 2022" organised by Headline Daily. The award aims to recognise enterprises achieving outstanding performance in their own sectors, especially in areas of ESG. It is another testimony to ATAL's long-term commitment to sustainability. By integrating sustainability into operations and business strategy, the group endeavours to create shared value for a more connected and sustainable future.

In early November, **Hong Kong Air Cargo Terminals Limited (“Hactl”)** held its annual event “Green Week” at SuperTerminal 1 to motivate the team and community to continue along the path to a greener and more inclusive society through behavioural change. This year, Hactl continued to invite their long-term partners to set up booths at the terminal to promote the significance of mindful consumption and enabled Hactl’s colleagues to interact with people in recovery. Under the theme of “Our Green Terminal”, Hactl redesigned the event format – by placing all booths closer to the workplaces of the operation staff, as well as adding a mini-game on the Green Week online platform to illustrate practical green acts at the terminal. At Hactl, sustainability education is all about collaboration action and the company is committed to learning, progressing and evolving continuously together for a greener terminal.

Hong Kong Disneyland Resort (“HKDL”) continues its waste management initiatives to reduce, reuse, recycle and donate, encouraging the promotion of behavioural change initiatives for its guests and cast in order to divert as much material as possible from landfills. As part of Disney’s 2030 environmental goal to achieve zero landfill waste, HKDL is encouraging behavioural change among its cast by replacing individual desk-side trash cans with centralised collection and recycling stations. This programme aims to reduce waste and enhance resource recycling at the workplace. HKDL believes that nurturing its cast to be sustainability change makers is an important step toward becoming waste-free. The resort is continuing to extend the comprehensive recycling stations to 21 backstage locations and has installed food waste collection bins in all backstage pantries, breakrooms and canteens.

Building up to COP27, **Arup** successfully organised the Race to Resilience Asia event series from 31 October to 4 November. In partnership with 40 leading organisations and think tanks, the series brought together over 40 influential speakers and experts, attracting an attendance of close to 3,000, online and in-person. The overall message resonating throughout the seven events is clear: both the challenges and solutions to climate mitigation and adaptation lie within our cities. And collaboration and coordination are needed, systematically and at scale, to create greener, better and more sustainable cities. The event recordings are now available online for anyone to revisit.

In support of reaching net zero, **WSP** has approved near- and long-term science-based emission reduction targets with the Science Based Targets initiative ("SBTi")'s new Net-Zero Standard. For near-term target, WSP commits to reduce absolute scope 1 and 2 (market-based) GHG emissions by 60% by 2030 from a 2018 base year. WSP also commits to reduce absolute scope 3 GHG emissions by 30% within the same timeframe. For long-term target, WSP commits to reduce absolute scope 1, 2, and 3 GHG emissions by 90% by 2040 from a 2018 base year. WSP will prioritise reductions in direct emissions, and all residual emissions will be neutralised in line with SBTi criteria to achieve net zero by 2040. WSP is proud to be among the leading companies to achieve this approval, and the company is well positioned to continue to drive sustainable growth as a core part of its business.

Please reach out to hello@rethink-event.com for details.

New research from **GlobeScan** finds that two in three people say they are willing to reduce their consumption by half to avoid environmental damage and climate change, especially those who have worried children at home. Global concern about climate change is at an all-time high and the majority of people living with children under the age of 18 say their children are very worried about environmental problems and climate change. Consumers have also become less likely to say they are willing to pay more for products or brands that contribute positively to society or the environment.

As part of its decarbonisation effort, **Shiu Wing Steel Ltd** has recently installed a 1.3 MW solar photovoltaic system at its Tuen Mun steel mill. Designed and supplied by fellow BEC member CLPe Solutions, the solar PV system is the largest one built on a single roof in Hong Kong. Together with another 80kW PV system on the office building rooftop, Shiu Wing has installed a total of 2,660 PV panels, generating 1,500,000 kWh annually. This is equivalent to the annual electricity consumption of 330 Hong Kong households or planting 25,438 trees. Approximately 555,000 kg of carbon emission can be effectively reduced from the utility per year.
